PVC stands for polyvinyl chloride or vinyl. This ingredient is found in products such as vinyl, luxury vinyl tile, vinyl composition tile, sheet vinyl, etc. Vinyl is a man made chemical that studies have shown releases dioxins that are persistent in the environment. There are also life cycle implications of PVC as it has a high chlorine content and phthalates, and it's very difficult to recycle. Thus, PVC-free products are specifically products that do not contain polyvinyl chloride. Their ingredients vary and can range from alternative chemical compositions, to bio-based products.
