Abstracts

PVC insulation tape (also known as PVC insulation tape, PVC refers to plastic with chlorinated polyethylene resin as the main component) is made of soft polyethylene film with one side coated with rubber-based pressure-sensitive adhesive. PVC insulation tape has good insulation properties, high voltage resistance, high temperature resistance and high flame retardancy. It is widely used for the insulation and protection of electrical components and wires. Specific product specifications of PVC tape can be made according to customer requirements, with red, yellow, blue, white, black, transparent and other colors. PVC tape is non-corrosive and resistant to moisture and UV. In addition, because PVC is a thermoplastic polymer, it has excellent mechanical properties, better insulation and higher resistance to chemicals in industrial applications, making it an ideal product for assembling electronic components in the electrical and electronics industries.
