Abstracts

The global PVDF Resin market size is expected to reach \$ 5701.3 million by 2029, rising at a market growth of 6.3% CAGR during the forecast period (2023-2029).

Global main manufacturers of PVDF Resin include Arkema, Solvay and Kureha Corporation, etc. The top five players hold a share about 80%. The largest market is Asia Pacific, holds a share about 55%. In terms of product type, PVDF Powder is the largest segment, occupied for a share of about 83%, and in terms of application, Lithium-ion Battery Binders has a share about 39 percent.

Polyvinylidene fluoride (PVDF) is a type of thermoplastic fluoropolymer, which possess high inertness and stability. It is formed from polymerization of vinylidene difluoride. PVDF resins are used for easy processing in the molding, extrusion, and compounding as thermostatic polymer. It is also used as powder to make solutions, additives, and others. It has high chemical resistance toward chlorine, bromine, iodine, and other acids at high temperature. It is available as piping products, sheet, tubing, films, plate and an insulator for premium wire. It can be injected, molded, or welded and is commonly used in the chemical, semiconductor, medical, and defense industries, as well as in lithium-ion batteries. It is also available as a cross-linked closed-cell foam, used increasingly in aviation and aerospace applications.

This report studies the global PVDF Resin production, demand, key manufacturers, and key regions.
