According to our (Global Info Research) latest study, the global PVG Proportional Multi-Way Valve market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

PVG proportional multi-way valve is a commonly used hydraulic control component, the full name is Proportional Valve Group, that is, proportional valve group. It is usually used in hydraulic systems to control actuators (such as hydraulic cylinders, hydraulic motors, etc.) by controlling the flow and pressure of hydraulic oil. PVG proportional multi-way valve is composed of valve body, valve core, electromagnet, position sensor and other components. By changing the current signal of the electromagnet, the position of the valve core can be controlled, thereby changing the flow and pressure of the hydraulic oil, and controlling the actuator. PVG proportional multi-way valve has the characteristics of fast response, high precision and good stability, and is widely used in various hydraulic systems, such as machine tools, metallurgical equipment, ships, aerospace and other fields.

The future development trend of the PVG proportional multi-way valve industry will be mainly reflected in the following aspects: 1. Size miniaturization: With the development of miniaturization technology, the size of multi-way valves is gradually reduced and the volume is more compact, making it suitable for wider scope. 2. Automated control: The control method of multi-way valves is gradually developing in the direction of automation. Remote control and automatic control are realized through electrical, hydraulic, pneumatic and other methods, which improves the operational efficiency and accuracy of pipeline switching. 3. Application of high temperature, high pressure and corrosive media: With the continuous growth of demand in the industrial field, the

application scenarios of multi-way valves will gradually increase, including high temperature, high pressure, corrosive media and other environments.
