## Abstracts

The global Pyro-Fuse market size is expected to reach \$ 879 million by 2029, rising at a market growth of 8.5% CAGR during the forecast period (2023-2029).

Global key manufacturers of pyro-fuse include Autoliv, Daicel, Pacific Engineering Corporation (PEC), and others. The top three producers together account for more than 60% of the market share, with the largest producer being Autoliv, accounting for 28%. The global origins are mainly distributed in North America, Europe, China, Japan, Korea, etc., of which Europe is the largest production region, with a market share of 53%. In terms of product categories, high voltage holds the largest market share with 53%, followed by mid voltage with 33%. In terms of its applications, the automotive industry holds a larger market share with 80%.

Pyro-Fuse is a high voltage positive battery terminal fuse that explodes and irreversibly disconnects the electrical connection in the event of an accident or collision in a car to avoid a short circuit or fire. Pyro-fuse, like traditional fuse, is also a one-time device. After the circuit is disconnected by blasting, the device will be damaged. It can safely and instantaneously turn off the high-voltage current. It can be used not only in electric vehicles, but also in any industrial scene that requires instantaneous circuit isolation.

This report studies the global Pyro-Fuse production, demand, key manufacturers, and key regions.
