According to our (Global Info Research) latest study, the global Pyrotechnic Inflator market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Inflators produce a quantity of gas, with a certain composition, temperature, and controlled rate. Inflators fill the airbag system to sufficiently cushion an automobile occupant in certain injury scenarios. Pyrotechnic inflators generate gas by combustion of a propellant. In case of an accident, the gas generation process is triggered by an electric signal to the initiator, subsequently igniting the propellant. Pyrotechnic inflators are widely used while providing a small size and low weight.
