## Abstracts

According to our (Global Info Research) latest study, the global Quad-port Coaxial Connector market size was valued at US\$ 350 million in 2024 and is forecast to a readjusted size of USD 538 million by 2031 with a CAGR of 6.3% during review period.

A four-port coaxial connector is an RF/microwave connector that integrates four independent coaxial channels. It realizes multi-channel signal transmission through a single interface. Each channel works independently and has high frequency and low loss characteristics. Its core function is to integrate four coaxial signals (such as differential signals and single-ended signals) into one physical interface. It is suitable for communication, radar, test and measurement and other fields that require multi-channel parallel transmission.
