## Abstracts

The global Quantum-secure Encryption Card market size is expected to reach \$ 307 million by 2032, rising at a market growth of 24.0% CAGR during the forecast period (2026-2032).

In 2025, global sales of Quantum-secure Encryption Card reached approximately 20 k units, with an average market price of about USD 3300 unit, an annual production capacity of roughly 23 k units, and an industry-average gross margin of approximately 28%.

A Quantum-secure Encryption Card is a hardware device or hardware entropy-source system that generates unpredictable random bit streams by exploiting the intrinsic randomness of quantum physical processes. This study focuses on commercially supplied or integrable QRNG chips, quantum entropy-source chips, modules, USB/PCIe cards, rack-mounted or server-type devices, and OEM hardware designs that can be embedded into third-party security, communication, computing or industrial systems. A typical QRNG consists of a quantum entropy source, optical or semiconductor detection components, analog sampling circuitry, randomness extraction or post-processing logic, health-test mechanisms, interface protocols and supporting software drivers. Common technology routes include photon arrival-time measurement, laser phase noise, quantum vacuum fluctuation, shot noise, electron tunneling, avalanche breakdown and radioactive decay. Key performance parameters include random bit generation rate, entropy-source assurance, randomness-test compliance, interface type, form factor, power consumption, temperature stability, certification status and ease of system integration. QRNGs are mainly used in cryptographic key generation, quantum key distribution, hardware security modules, VPNs, cloud security infrastructure, IoT security, automotive cybersecurity, gaming and lottery systems, Monte Carlo simulation,

statistical sampling and other applications requiring high-quality unpredictable randomness.

This report studies the global Quantum-secure Encryption Card production, demand, key manufacturers, and key regions.
