According to our (Global Info Research) latest study, the global Quartz market size was valued at USD 11340 million in 2023 and is forecast to a readjusted size of USD 21760 million by 2030 with a CAGR of 9.8% during review period.

This report studies the Quartz market, Quartz is crystallised silicon dioxide (SiO₂), which is usually white or transparent, although it can be found in other colors if it comes into contact with impurities during its formation.

Quartz is one of the hardest natural materials on earth and has an appearance similar to granite. It is comprised of silicon dioxide. It is naturally scratch and stain resistant and non-porous; bacteria, mold and mildew don't grow very easily on quartz counters. This crystalline mineral is used for kitchen and bathroom counters, though it is more commonly used in jewelry and electronics.

Quartz counters are made from either a natural slab that has been polished or engineered quartz composite. Pure, natural slabs are very expensive and are therefore quite uncommon as countertops. The engineered type is made of 93 to 97 percent ground quartz combined with resins, binders and pigments. This combination is poured into molds and allowed to harden, then finished into the shape and style desired. This type of counter is much more affordable and common than the natural slab.

Global Quartz key players include Cosentino Group, Caesarstone, Hanwha L&C, Compac, Vicostone, Dupont, etc. Global top six manufacturers hold a share over 17%.

North America is the largest market, with a share over 35%, followed by Europe and China, both have a share about 35 percent.

In terms of product, Press Molding is the largest segment, with a share about 75%. And in terms of application, the largest application is Kitchen Countertops, followed by Facades, Flooring, etc.
