According to our (Global Info Research) latest study, the global Quartz Stone market size was valued at US\$ 16450 million in 2025 and is forecast to a readjusted size of US\$ 34580 million by 2032 with a CAGR of 11.3% during review period.

Quartz stone is made from either a natural slab that has been polished or engineered quartz composite. Quartz is one of the hardest natural materials on earth and has an appearance similar to granite. It is comprised of silicon dioxide. Pure, natural quartz slabs are very expensive and are therefore quite uncommon as countertops. The engineered type is made of 93 to 97 percent ground quartz combined with resins, binders and pigments. This combination is poured into molds and allowed to harden, then finished into the shape and style desired. This type of counter is much more affordable and common than the natural slab. The Quartz stone is used for kitchen and bathroom counters, no matter in personal home or commercial establishments or other industries.

Global Quartz Stone key players include COSENTINO, Caesarstone, Hanwha L&C, Compac, Dupont, etc. Global top five manufacturers hold a share over 30%.

North America is the largest market, with a share over 35%, followed by Europe and Asia-Pacific, both have a share about 50 percent.

In terms of product, Quartz Surface is the largest segment, with a share about 65%. And in terms of application, the largest application is Residential Quartz, followed by Commercial Quartz.
