According to our (Global Info Research) latest study, the global Quartz Tubing market size was valued at US\$ 628 million in 2024 and is forecast to a readjusted size of USD 913 million by 2031 with a CAGR of 5.6% during review period.

Quartz Tubing (also Quartz glass tube, Quartz tube) is special industrial technology glass made from silicon dioxide and is one kind of excellent basal material. Quartz tubes have many excellent features, such as ultra-high purity, good spectral transmission, well controlled dimensions and lower (OH) Hydroxyl.

Global core quartz tubing manufacturers include Momenive Technologies, Heraeus etc. The top 2 companies hold a share about 70%. China is the largest market, with a share about 45%, followed by North America and Europe with the share about 20% and 15%. In terms of product, transparent quartz tube is the largest segment, with a share over 95%. And in terms of application, the largest application is photovoltaic, followed by lamp.

USA, Germany, Japan, etc. are now the key developers of quartz tubing. Players such as Heraeus (DE), Momenive (US) and TOSOH (JP) are key player in the high end product, which are mainly focus on the semiconductor use, which in China, players focus more on PV and lamp application. Since the water in Japan and South Korea must meet the direct drinking standard, their water filters require ultraviolet searchlights, and the ultraviolet searchlights use quartz tubes. This is currently the largest application in the lighting field.
