The use of Quick Connectors in automotive fluid line systems offers significant cost advantages in the following areas:

Increased installation efficiency: The Quick Connectors design simplifies the installation process by eliminating the need for additional tools or complex installation operations, significantly reducing assembly time and therefore labour costs. The time saved by the factory in mass production also contributes to lower overall assembly costs.

Reduced risk of leaks and maintenance costs: Quick release couplings provide better sealing performance than traditional connections, reducing the risk of leaks, maintenance requirements and associated costs. Reduced leakage and rework also result in indirect cost savings.

Component versatility and applicability: Quick release couplings are suitable for a wide range of fluids (e.g. coolant, fuel, oil, etc.), allowing manufacturers to reduce the number of parts connected to different lines through standardised design, thereby reducing

inventory and supply chain management costs.
