A quick-release locking coupler is a specialized tool used to securely connect grease guns to grease fittings (zerk fittings) during lubrication tasks. It features a quick-release mechanism, allowing it to be attached and detached from the fitting easily, even under high pressure. This design ensures a tight seal to prevent grease leakage, enabling precise application and reducing waste. The coupler typically has a spring-loaded mechanism or a sliding sleeve that clamps firmly onto the fitting when engaged and can be released with minimal effort.
