According to our (Global Info Research) latest study, the global Quick Release Valve market size was valued at US\$ 89.4 million in 2024 and is forecast to a readjusted size of USD 127 million by 2031 with a CAGR of 5.1% during review period.

A Quick Release Valve (QRV) is a pneumatic or hydraulic valve designed to rapidly vent air or fluid from a system, enabling faster system response times, especially in actuation systems like brakes, clutches, or cylinders. It is commonly used in compressed air circuits, such as in automotive braking systems or industrial automation, to reduce pressure and release energy quickly when needed. The valve functions by allowing air to exhaust directly to the atmosphere rather than routing it back through control systems, thereby minimizing delay and improving operational efficiency.
