The rack-mounted electric energy data collection terminal uses high-performance 32-bit embedded RISC CPU (ARM9 core) hardware platform, real-time embedded LINUX operating system software platform, Ethernet/dial-up MODEM/dedicated line MODEM and other communication technologies to develop electric energy data. Collect terminal high-end products. It has the following characteristics: a large number of connected electric meters, up to 256 electric meters can be connected; rich electric meter protocols, which can be connected to electric meters of different protocols commonly used in China; many uplink communication channels, supporting Ethernet, dial-up MODEM, RS-232/ RS-485, GPRS/CDMA, etc.; has rich uplink protocols, supports the main protocols of provincial networks across the country, and can communicate with multiple master stations at the same time; supports the IEC61850 standard to meet the requirements of smart substations.

From 2016 to 2021, the demand for downstream application fields of electrical information collection systems has shown steady growth, so it continues to promote the rapid development of the industry. According to data, in 2021, my country's power generation capacity was 8,112.18 billion kilowatt-hours, a year-on-year increase of 8.1%. The whole society's electricity consumption was 8,312.8 billion kilowatt-hours, a year-on-year increase of 10.3%. The installed power generation capacity was approximately 2.38 billion kilowatts, a year-on-year increase of 7.9%. Therefore, as the

downstream market demand continues to expand, the market space for user electricity information collection systems will continue to be released. User power information collection systems mainly require smart meters and power information collection and management systems. From 2021 to 2026, the construction of smart meters and power information collection systems will bring a total market demand of more than 200 billion yuan. In the next 2-3 years, The smart electricity market is expected to maintain an average annual growth rate of 20%-30%.
