Rack and pinion steering gear is a type of steering system commonly used in vehicles. It consists of a rack (a linear gear) and a pinion (a circular gear) that work together to convert the rotational motion of the steering wheel into the linear motion needed to turn the front wheels. As the steering wheel is turned, the pinion gear rotates and moves the rack left or right, causing the wheels to turn in the desired direction. This system provides a direct and responsive steering feel, making it popular in modern vehicles.
