The global Radial Agriculture Tires market size is expected to reach \$ 3479.7 million by 2029, rising at a market growth of 4.3% CAGR during the forecast period (2023-2029).

Global key radial agriculture tires manufacturers include Michelin, Bridgestone, Titan International etc. The top 5 companies hold a share about 75%. Asia-Pacific is the largest market, with a share about 40%, followed by Europe and North America with the share about 35% and 20%. In terms of product, less than 1600mm is the largest segment, with a share over 55%. And in terms of application, the largest application is tractors, followed by harvesters.

Radial agriculture tire is a particular design of agriculture vehicle tire. The cord plies of radial agriculture tires are arranged at 90 degrees to the direction of travel, and the under-tread area is wrapped around the circumference of the tire by radial belts of steel or fabric. With a radial tire, sidewall flex is not transferred to the tread, allowing for more even wear. This means the tread on a radial tire can last 2–3 times longer than a bias tire's tread.

This report studies the global Radial Agriculture Tires production, demand, key manufacturers, and key regions.
