Abstracts

The global Radial Blowers with High Pressure for Ventilator market size is expected to reach $ 517 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

In 2025, the global production volume of Radial Blowers with High Pressure for Ventilator reached approximately 4.5 million units, with an average selling price of US$85 per unit, production capacity of approximately 5.5 million units, and gross margin of 32%.

Radial Blowers with High Pressure for Ventilator are specialized airflow driving components used in medical respiratory equipment. By using high-speed rotating impellers, these blowers generate high static pressure and stable airflow to provide continuous and precise air delivery for ventilators. These blowers typically adopt brushless DC motor technology and feature high efficiency, low noise, compact design, and long-term continuous operation capability. They are widely used in non-invasive ventilators, invasive ventilators, and home respiratory therapy devices to meet requirements for pressure control, airflow regulation, and operational reliability.

The upstream industry mainly consists of motor manufacturers, permanent magnet material suppliers, engineering plastic and metal component suppliers, electronic control component suppliers, and precision mold manufacturers, which provide essential components and manufacturing capabilities for high-pressure radial blowers. The midstream includes specialized blower manufacturers and medical component suppliers that produce ventilator-grade blowers through impeller design, motor control, airflow optimization, and system integration technologies. The downstream applications

mainly include ventilators, CPAP/BiPAP devices, home respiratory therapy equipment, and other medical airflow delivery systems, serving hospitals, home healthcare, and long-term respiratory disease management scenarios.

Report Scope

This report studies the global Radial Blowers with High Pressure for Ventilator production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Radial Blowers with High Pressure for Ventilator and provides market size (US$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Radial Blowers with High Pressure for Ventilator that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Radial Blowers with High Pressure for Ventilator total production and demand, 2021-2032, (K Units)

Global Radial Blowers with High Pressure for Ventilator total production value, 2021-2032, (USD Million)

Global Radial Blowers with High Pressure for Ventilator production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Radial Blowers with High Pressure for Ventilator consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Radial Blowers with High Pressure for Ventilator domestic production, consumption, key domestic manufacturers and share

Global Radial Blowers with High Pressure for Ventilator production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Units)

Global Radial Blowers with High Pressure for Ventilator production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global Radial Blowers with High Pressure for Ventilator production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Radial Blowers with High Pressure for Ventilator market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Micronel AG, Airfan, ebm-papst, Boreasa, Delta, Sofasco Fans, Nidec, NMB Technologies Corporation, SANYO DENKI, Zhejiang Weicheng Blower, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Radial Blowers with High Pressure for Ventilator market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US$ Millions), volume (production, consumption) & (K Units) and average price (US$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
