Abstracts

According to our (Global Info Research) latest study, the global Radial Dipped Tantalum Capacitor market size was valued at US\$ 150 million in 2025 and is forecast to a readjusted size of US\$ 207 million by 2032 with a CAGR of 4.1% during review period.

In 2025, global Radial Dipped Tantalum Capacitor production reached approximately 292,000 k units?with an average global market price of around US\$ 0.5 per unit, and a gross profit margin of approximately 20%-40%. Radial Dipped Tantalum Capacitors are leaded tantalum capacitors with radial wire terminations and resin or epoxy dipped encapsulation. They are designed to provide stable capacitance, low leakage current, compact size, long service life, and reliable performance under temperature and voltage stress. These capacitors are widely used in industrial electronics, power supplies, communication equipment, instrumentation, medical devices, automotive electronics, aerospace electronics, control systems, and replacement applications for through-hole circuit boards. Compared with surface-mount tantalum capacitors, radial dipped types are easier to manually assemble, inspect, repair, and use in legacy or high-reliability through-hole designs. The industrial chain of Radial Dipped Tantalum Capacitors includes upstream tantalum powder, tantalum wire, manganese dioxide or polymer cathode materials, epoxy resin, silver paste, graphite, lead wires, packaging materials, molding materials, electrolyte chemicals, and testing equipment. The midstream includes anode pressing, sintering, dielectric formation, cathode layer processing, lead attachment, resin dipping, curing, marking, aging, electrical testing, reliability screening, quality control, and packaging. Downstream applications include industrial control boards, power modules, telecom equipment, medical electronics, aerospace and defense electronics, automotive electronics, measuring instruments, consumer electronics, and maintenance replacement markets. Related services include product

selection, reliability testing, custom voltage or capacitance supply, technical support, and failure analysis.
