The radial tile saw is an electric tool designed for high-precision cutting of hard materials such as tiles, stones, marble, etc. Its core feature is that the cutting head (usually equipped with a diamond saw blade) can slide radially along the guide rail to achieve smooth straight or angled cutting. Unlike handheld or fixed cutting machines, radial tile saws have a stable structure and are usually equipped with a water cooling system to reduce overheating of the saw blade and suppress dust. They are suitable for large-scale construction, interior decoration and fine parquet operations. It is widely used in construction projects, kitchen and bathroom renovations, stone processing and other scenarios. It is one of the preferred cutting equipment for professional craftsmen and high-end DIY users.
