According to our (Global Info Research) latest study, the global Radio Transmitter market size was valued at USD 344 million in 2023 and is forecast to a readjusted size of USD 355.9 million by 2030 with a CAGR of 0.5% during review period.

A radio transmitter is an electronic device which, when connected to an antenna, produces an electromagnetic signal such as in radio and television broadcasting, two way communications or radar. Heating devices, such as a microwave oven, although of similar design, are not usually called transmitters, in that they use the electromagnetic energy locally rather than transmitting it to another location.

A radio transmitter is usually part of a radio communication system which uses electromagnetic waves (radio waves) to transport information (in this case sound) over a distance.

In our report, the radio transmitters with power levels of 1kW to 500kW are included.

Global key players of radio transmitter include GatesAir, Broadcast Electronics, R&S, Syes and Egatel(COMSA), etc. Top 5 players occupy for a share about 50%.
