## Abstracts

The global Radio Transmitter market size is expected to reach \$ 362 million by 2032, rising at a market growth of 0.5% CAGR during the forecast period (2026-2032).

A radio transmitter is an electronic device which, when connected to an antenna, produces an electromagnetic signal such as in radio and television broadcasting, two way communications or radar. Heating devices, such as a microwave oven, although of similar design, are not usually called transmitters, in that they use the electromagnetic energy locally rather than transmitting it to another location.

A radio transmitter is usually part of a radio communication system which uses electromagnetic waves (radio waves) to transport information (in this case sound) over a distance.

In our report, the radio transmitters with power levels of 1kW to 500kW are included.

Global key players of radio transmitter include GatesAir, Broadcast Electronics, R&S, Syes and Egatel(COMSA), etc. Top 5 players occupy for a share about 50%. Asia-Pacific is the largest market, with a share about 40%, followed by North America and Europe. In terms of product, FM radio transmitter is the largest segment, with a share about 50%. In terms of application, automobile is the largest market, with a share over 45%.
