According to our (Global Info Research) latest study, the global Rail Cables market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Rail cables are very important in order to meet the current challenges the railway industry is confronted with. It doesn't matter if it is the current supply on board or in the base of the rail, various control tasks, data transmission or if a complete cable network is required – in all fields cables for highest performance requirements are needed. Besides being halogen free the used railway cables have to be flame retardant and self-extinguishing and are not allowed to enhance flame propagation.

According to the data of China Association of Metros, by the end of 2022, 55 cities in mainland China have opened urban rail transit and 308 operating lines. The total length of operating lines is 10287.45 km, ranking first in the world and accounting for 26.2% of the total global mileage. 1080.63 km of new operating lines were added in 2022. By the end of 2022, 545 cities in 78 countries and regions will have opened urban rail transit, with more than 41,386.12 km of operational mileage. Compared to 2021, the total mileage of urban rail transit worldwide would increase by 4,531.92 km, an increase of 11.0%, of which 1,293.45 km of subway mileage, 788.11 km of light rail mileage and 2,450.36 km of tram mileage would increase, accounting for 28.5%, 17.4% and 54.1% of the total increase respectively.
