Abstracts

Rail transit vehicle maintenance refers to the management and maintenance of rail transit operation equipment and facilities. It is through the detection and monitoring of rail transit infrastructure and key equipment, and regular or irregular inspections and maintenance to ensure that they are in a safe state and ensure Rail transit operation safety. Rail transit is a mode of transportation based on fixed-line tracks that transports passengers and goods through dedicated rail transport vehicles. Rail transportation can be divided into railways (mainly ordinary speed railways and high-speed railways) and urban rail transportation (mainly subways, light rails, and trams).
