The growth in the field of composites in the rain-proof coating market is mainly attributed to high strength, higher durability and design flexibility. Due to its low cost and easy-to-install technology, it holds the highest market share of all materials used for rain cover. Because of its high durability, composite materials have a long shelf life of about 30-40 years and are maintenance-free, making them the most preferred rain-resistant coating materials for residential and non-residential buildings. Their ease of maintenance and installation saves the extra labor costs involved.
