Abstracts

According to our (Global Info Research) latest study, the global RAIN RFID Hardware Products market size was valued at US\$ 1293 million in 2025 and is forecast to a readjusted size of US\$ 1938 million by 2032 with a CAGR of 6.1% during review period.

RAIN RFID hardware products are devices operating in the UHF RFID spectrum (based on EPC Gen2 / ISO 18000-63 standards) that enable wireless identification, tracking, and data capture of tagged objects over long ranges, including tags, readers, antennas, and supporting hardware, widely used for real-time visibility in retail, logistics, manufacturing, and asset management systems.

The RAIN RFID hardware industry chain starts upstream with semiconductor chip manufacturers, antenna material suppliers, and electronic component providers, followed by midstream companies that design and produce RFID tags, readers, antennas, and encoding equipment through chip integration, inlay production, and device assembly, and extends downstream to system integrators, software providers, and end users across retail, logistics, manufacturing, healthcare, and aviation sectors, where solutions are deployed for real-time tracking and data analytics, supported by distribution partners, cloud platforms, and service providers, with increasing demand driven by digitalization, supply chain transparency, and automation initiatives worldwide.

Current and planned projects in the RAIN RFID hardware sector include expansion of chip fabrication capacity for RFID ICs, new inlay and tag production facilities in Asia and North America, deployment of large-scale RFID infrastructure in retail chains for item-level tagging, logistics hubs implementing automated tracking systems, airport baggage handling upgrades, and smart manufacturing initiatives integrating RFID with IoT

platforms, alongside pilot programs in healthcare and smart cities, with ongoing investments in advanced reader development, sustainable tag materials, and high-speed encoding technologies reflecting strong growth in digital supply chain transformation and real-time asset visibility.
