Rapid Anti-HCV(Hepatitis C Virus) Test Kit (Colloidal Gold Method) is used to detect a patient's exposure to the hepatitis C virus (HCV). Antibodies are proteins produced by the body to fight against foreign substances, such as viruses and bacteria. The presence of the antibodies associated with HCV (anti-HCV antibodies) can help determine if a person is currently infected or has previously been infected with HCV. Often referred to as the 'silent epidemic', hepatitis C is a disease of the liver caused by a virus. Over time, hepatitis C can lead to permanent liver damage including cirrhosis, liver cancer and liver failure causing premature death. The test is intended for healthcare professionals and trained healthcare workers to use as an aid for diagnosis.
