## Abstracts

According to our (Global Info Research) latest study, the global Rapid Blocking Solution market size was valued at US\$ 479 million in 2024 and is forecast to a readjusted size of USD 689 million by 2031 with a CAGR of 5.4% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Protein-free Rapid Blocking Solution is a ready-to-use, efficient and rapid blocking solution for western blot experiments. The blocking time is only 10 minutes, and the effect is better than traditional blocking solutions such as skim milk powder, BSA, casein, etc., simplifying the western blot protocol. Blocking with Rapid Blocking Solution can prevent non-specific binding during antibody detection, but allow specific detection. Compared with traditional blocking solutions, there is a higher signal, lower background value, and higher signal-to-noise ratio.
