Rapid Set Repair Mortar is a high-performance, fast-setting, and durable material specifically designed for repairing and resurfacing concrete structures. It is a hydraulic cement-based mortar formulated to achieve high early strength and set rapidly, often within 15 minutes, allowing for quick turnaround times in construction or repair projects. This material is ideal for applications requiring a strong bond to existing concrete, such as patching spalls, cracks, and other surface defects in horizontal, vertical, or overhead positions. Rapid Set Repair Mortar is shrinkage-compensated, minimizing cracking and ensuring dimensional stability. It can be applied in a single layer for thin or thick repairs and is compatible with a variety of finishing techniques, enabling a smooth and uniform surface. Its versatility and performance make it a preferred choice for infrastructure, industrial, and commercial repair projects requiring minimal downtime and high durability.
