According to our (Global Info Research) latest study, the global Rapid-setting Asphalt Emulsion market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Rapid-setting asphalt emulsion is a type of asphalt emulsion that sets and hardens quickly upon application, typically within an hour or less. It is often used for patching and repairing potholes, cracks, and other types of pavement damage. The rapid-setting properties of this type of asphalt emulsion allow for quick repairs to be made, reducing the amount of time that roadways need to be closed to traffic. It is also commonly used in cold weather conditions, as it can set and harden at lower temperatures than traditional hot-mix asphalt.
