## Abstracts

The global Raw Rice Paper market size is expected to reach \$ 2923.5 million by 2030, rising at a market growth of 4.2% CAGR during the forecast period (2024-2030).

Raw rice paper is divided into single leaflets, single-fold leaflets, double-fold leaflets, three-layer leaflets, etc. This is mainly different from thick leaflets, which are suitable for banners with larger than square inches of cursive, running cursive and regular script, that is, larger fonts.

Raw rice paper has strong water absorption and is easy to "take ink", that is, it has strong translucency and will melt immediately depending on the amount of water when ink is applied. Before buying paper or writing a pen, people like to dip it in water to distinguish the freshness of raw and cooked paper.

This report studies the global Raw Rice Paper production, demand, key manufacturers, and key regions.
