This report studies the Ready Mix Concrete (RMC) market; Ready Mix Concrete is a ready-to-use material which is a mixture of Cement, Sand, Aggregate and Water. RMC is a type of Concrete which is mixed in a batching plant according to the specification of the customer and delivered to the site by the use of transit mixer as it is away from the construction site.

Use of ready mix concrete in the construction industry aids in saving time and less hustle at the construction site. Ready-mix concrete is not manufactured at the construction site, however it is transported from that spot to the construction project within a certain a period of time, depending on the technique of preparation. Ready-mix concrete is used in residential, commercial and infrastructural construction.
