According to our (Global Info Research) latest study, the global Ready-Mix Concrete market size was valued at USD 492420 million in 2023 and is forecast to a readjusted size of USD 554960 million by 2030 with a CAGR of 1.7% during review period.

This report studies the Ready Mix Concrete (RMC) market; Ready Mix Concrete is a ready-to-use material which is a mixture of Cement, Sand, Aggregate and Water. RMC is a type of Concrete which is mixed in a batching plant according to the specification of the customer and delivered to the site by the use of transit mixer as it is away from the construction site.

Use of ready mix concrete in the construction industry aids in saving time and less hustle at the construction site. Ready-mix concrete is not manufactured at the construction site, however it is transported from that spot to the construction project within a certain a period of time, depending on the technique of preparation. Ready-mix concrete is used in residential, commercial and infrastructural construction.

Ready Mix Concrete is being preferred over traditional concrete owing to ease of use, greater convenience, economy, and better quality. Furthermore, wastage reduction, low inventory costs, and efficient utilization will lead to the lowering of the overall project expenditures which in turn will augment the product demand over the upcoming years.

In this report, the M Cbm means million cubic meters, which is the unit of product volume, and M USD means the million USD dollars.
