According to our (Global Info Research) latest study, the global Ready Mixed Concrete Truck market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A concrete mixer (often colloquially called a cement mixer) is a device that homogeneously combines cement, aggregate such as sand or gravel, and water to form concrete. A typical concrete mixer uses a revolving drum to mix the components. For smaller volume works, portable concrete mixers are often used so that the concrete can be made at the construction site, giving the workers ample time to use the concrete before it hardens. An alternative to a machine is mixing concrete by hand. This is usually done in a wheelbarrow; however, several companies have recently begun to sell modified tarps for this purpose.

Briefly speaking, in the next few years, Concrete Mixer Trucks industry will still be a highly energetic industry. Sales of Concrete Mixer Trucks have brought a lot of opportunities, there will more companies entering this industry, especially in developing countries like Vietnam, Myanmar, etc .
