Ready-to-Eat (RTE) Frozen Food refers to frozen meals and food products that are fully cooked or pre-prepared and require only reheating (microwave, oven, air fryer, or pan) before consumption, with no additional cooking steps needed. RTE frozen foods are widely used across household retail and foodservice channels, driven by increasing demand for convenience, time efficiency, and consistent quality. Typical products include frozen fried foods, prepared meals, rice and noodle dishes, pizzas, snacks, and fully cooked meat or seafood items. From a market perspective, RTE frozen food benefits from urbanization, smaller household sizes, higher labor costs in foodservice, and the growth of modern retail and cold-chain logistics. The segment is also supported by product innovation in taste, texture retention, healthier formulations, and compatibility with air fryers, making it one of the fastest-growing sub-segments within the global frozen food market.
