Therefore, for this group of people, nutritional supplements such as RUTF and LNS are in high demand, becoming a key factor in promoting their development.

Policy promotion: Governments in some countries and regions are aware of the seriousness of the malnutrition problem and have introduced relevant policies to promote the production and use of RUTF and LNS. For example, the government might provide nutritional supplements to poor families or promote these products through public health programs.

Technological progress: With the advancement of food science and technology, the production process of RUTF and LNS has been continuously improved, and the product quality and nutritional value have been improved. This makes these products more in line with consumer needs, thereby driving market development.

Market demand: With the improvement of people's living standards and the enhancement of health awareness, more and more consumers are paying attention to nutritional supplements. Especially in some special circumstances, such as disease recovery period, pregnancy, lactation, etc., the demand for nutritional supplements such as RUTF and LNS will further increase.

Global health initiatives: International organizations such as the United Nations Children's Fund (UNICEF) and the World Food Program (WFP) actively promote child nutrition improvement projects worldwide. These initiatives provide a broad market space for nutritional supplements such as RUTF and LNS.
