Rear-view Mirror is a mirror in automobiles, designed to allow the driver to see rearward through the vehicle's backlight. It is an important auto part in vehicles for the safety of drivers. The mirror is not ground flat -- the front glass surface is at an angle to the back (mirrored) surface. So if you looked at this mirror out of its casing, it would be wedge-shaped with the thicker edge at the top.

Asia-Pacific is estimated to dominate the automotive rear-view market during the forecast period. The region has emerged as a major automotive hub with the majority of the market share of vehicle production as well as sales. Almost every major automotive mirror manufacturer is present in the Asia-Pacific region. The demand for automotive mirrors is directly linked to the vehicle production in this region. To cater the growing demand and capitalize on cost efficiencies, the companies involved in the production of rear-view mirrors and their components have started focusing on the Asia-Pacific market.
