Abstracts

Rebar Cutting Tool is a tool used to cut steel bars. There are generally automatic steel bar cutting machines and semi-automatic steel cutting machines. It is one of the indispensable equipments for steel bar processing. It is mainly used for the fixed length cutting of steel bars in buildings, bridges, tunnels, power stations, large water conservancy projects, etc. Compared with other cutting equipment, the steel bar cutting machine has the characteristics of light weight, low energy consumption, reliable operation and high efficiency. Therefore, it has been gradually adopted by mechanical processing and small rolling mills in recent years.
