Recessed Air Curtain is an air barrier device integrated into the ceiling or door frame. It isolates indoor and outdoor air flow by generating a high-speed airflow barrier, improving environmental comfort and energy efficiency. As the device is concealed, its design is more beautiful and can be integrated with the interior decoration of the building, suitable for high-end and design-oriented places. Recessed air curtains can effectively prevent the exchange of hot and cold air, while blocking dust, insects and odors from entering the room. They are widely used in doorways where frequent entry and exit is required.
