Abstracts

A recessed light (also known as can lights or downlight) is a light fixture that is installed into a hollow opening in a ceiling. When installed it appears to have light shining from a hole in the ceiling, concentrating the light in a downward direction as a broad floodlight or narrow spotlight.

Recessed Lighting fixtures are comprised of three main parts, namely, the bulb, decorative trim and the housing.

Recessed lights have remained a favorite choice for modern, streamlined lighting in kitchens, bathrooms, hallways, basements, and in commercial spaces. They are used for both accent and general lighting, and because they are relatively compact, they work wonderfully in small spaces.

SCOPE OF THE REPORT:

At present, in the foreign industrial developed countries the Recessed Lighting industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in Asia.

Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area and in future still more new investment will enter into the field. Technology and cost are two major problems.

Although sales of Recessed Lighting brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk to enter this market.

The worldwide market for Recessed Lighting is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2024, from xx million US\$ in

2019, according to a new GIR (Global Info Research) study.
