Scope of the Report:

This report focuses on the Reciprocating Compressor in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. For industry structure analysis, the Reciprocating Compressor industry is relatively concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 52 % of the revenue market. Regionally, North America is the biggest production value area in 2016, also the leader in the whole Reciprocating Compressor industry.

China occupied 29.42% of the production market in 2016. It is followed by North America and Europe, which respectively account for around 25.29% and 17.25% of the global total industry. Other countries have a smaller amount of production. Geographically, North America was the largest consumption market in the world, which took about 26.75% of the global consumption volume in 2016.

For price trend analysis, a key variable in the performance of Reciprocating Compressor producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

For forecast, the global Reciprocating Compressor revenue would keep increasing with annual growth rate with 3~7%. We tend to believe that this industry still has a good future, considering the current demand of Reciprocating Compressor.

The worldwide market for Reciprocating Compressor is expected to grow at a CAGR of roughly 5.2% over the next five years, will reach 8330 million US\$ in 2023, from 6130 million US\$ in 2017, according to a new GIR (Global Info Research) study.
