Abstracts

Reclosable Fasteners offer advanced closure alternatives to zippers, screws, snaps, hooks, etc.

Reclosable Fasteners commonly consists of two components: typically, two lineal fabric strips (or, alternatively, round 'dots' or squares) which are attached (sewn or otherwise adhered) to the opposing surfaces to be fastened. The first component features tiny hooks, the second features smaller loops. When the two are pressed together the hooks catch in the loops and the two pieces fasten or bind temporarily. When separated, by pulling or peeling the two surfaces apart, the strips make a distinctive 'ripping' sound.

According to our (Global Info Research) latest study, the global Reclosable Fasteners market size was valued at US\$ 2774 million in 2023 and is forecast to a readjusted size of USD 4142 million by 2030 with a CAGR of 6.0% during review period.
