Abstracts

Recombinant Human Serum Albumin (Rec. HSA) is animal origin free expressed in E.coli without animal or human derived raw materials. It is also free from other contaminating serum proteins. Recombinant human serum albumin (rHSA) is genetically engineered and derived from a rice-based expression system. It is a highly purified and completely animal-, virus-, and bacteria-free product that was developed as an alternative to plasma-derived HSA, to which it is structurally equivalent.

This report studies the global Recombinant Human Serum Albumin production, demand, key manufacturers, and key regions.
