## Abstracts

Rectifier diode refers to the diode acts as rectifier with the main function of changing AC into DC and widely used in power rectifier circuit.

Scope of the Report:

This report focuses on the Rectifier Diode in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The main consumption regions are concentrated in the China, USA, Europe and Japan. The Rectifier Diode's consumption has great relationship with the local economical developed level and electric type production. Currently, the developing countries' growth rate has overcome the developed countries.

The import and export volume is very large, China has very large export ratio. Currently, the Rectifier Diode has little degree of anti-dumping phenomenon. The Europe and USA's consumption mainly depends on the import.

In the future, the Rectifier Diode will have a good future; the price fluctuation has relationship with the raw material. The technology will more mature and the application will more and more widely.

The worldwide market for Rectifier Diode is expected to grow at a CAGR of roughly 2.8% over the next five years, will reach 4310 million US\$ in 2023, from 3640 million US\$ in 2017, according to a new GIR (Global Info Research) study.
