Abstracts

The global Recycled Aluminum market size is expected to reach \$ 99550 million by 2029, rising at a market growth of -1.1% CAGR during the forecast period (2023-2029).

Global key players of recycled aluminum include Novelis, Norsk Hydro, UACJ, etc. The top three players hold a share about 23%. Asia Pacific is the largest market, has a share about 52%, followed by Europe and North America, with share 20% and 17%, separately.

Aluminium recycling is the process by which scrap aluminium can be reused in products after its initial production. The process involves simply re-melting the metal, which is far less expensive and energy-intensive than creating new aluminium through the electrolysis of aluminium oxide (Al₂O₃), which must first be mined from bauxite ore and then refined using the Bayer process.

This report studies the global Recycled Aluminum production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Recycled Aluminum, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year.
