Abstracts

The global Recycled CFRP market size is expected to reach \$ 399 million by 2032, rising at a market growth of 13.3% CAGR during the forecast period (2026-2032).

CFRP (Carbon fiber reinforced plastics/polymer) are ideal lightweight structural materials for aerospace, automotive, energy and sports industries. CFRP Recycle is recycling CFRP from end-of-life parts and waste generated in the production process, such as scrap materials, out-of-date prepreg. Carbon fiber is an advanced material ten times stronger than steel at only a quarter of its weight. CFRP, a composite material made of carbon fiber and plastic, has the added advantage of being highly resistant to deformation and to both acid and alkaline corrosion.

Global key players of Recycled CFRP include Carbon Fiber Conversions GmbH, Carbon Conversions, Gen 2 Carbon, Procotex, Mitsubishi Nantong Fuyuan, etc. The top five players hold a share about 57%. Europe is the largest market, and has a share about 35%, followed by North America and Japan with share 34% and 20%, separately. In terms of product type, Physical Process is the largest segment, accounting for a share of 90%. In terms of application, Automobiles is the largest field with a share about 42 percent.

This report studies the global Recycled CFRP demand, key companies, and key regions.
