Abstracts

PEEK -Polyetheretherketone is tough and rigid, with a continuous-use temperature rating of 475 degree F. The polymer is self-extinguishing and exhibits very low smoke emission on burning. Its crystallinity gives it resistance to most solvents and hydrolytic stability. PEEK is also resistant to radiation.

This report studies the global Recycled PEEK production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Recycled PEEK, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Recycled PEEK that contribute to its increasing demand across many markets.

The global Recycled PEEK market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

PEEK is basically manufactured and used in low tonnages. It is also very expensive, thus making recycling a necessity. The use of thermosetting polymers is only increasing and it is now important to find ways to dispose or recycle them without it becoming a major global concern.
