## Abstracts

According to our (Global Info Research) latest study, the global Recycled Plastics market size was valued at USD 19860 million in 2023 and is forecast to a readjusted size of USD 18950 million by 2030 with a CAGR of -0.7% during review period.

Recycled plastics are the plastics that made from post-consumer or post-industrial plastics instead of the virgin resin. The process of recycling used plastic from consumable products is an efficient means to reprocess the material into useful products. Many different products make great sources of recyclable material, including: soda bottles, plastic packaging, sheets and pellets. Recycled plastic is used to make many different types of products. The type of product that is made out of recycled plastic depends on the type of plastic resin. There are several different types of plastic resin used to make different products, such as PET, PP, HDPE and LDPE.

The market of recycled plastic is highly fragmented with a tail of manufacturers. As the largest production area of recycled plastics, there are more than 3000 companies supply recycled plastics. The market concentration in developed areas is higher comparatively. Leading suppliers in the worldwide are Clear Path Recycling, Clean Tech Incorporated, Mohawk Industries Incorporated, CarbonLite Industries, Envision Plastics Industries, Advanced Environmental Recycling Technologies Incorporated, Greentech and Veolia Polymers, which takes a combined share of less than 5%.

The Global Info Research report includes an overview of the development of the Recycled Plastics industry chain, the market status of Packaging (PET, PP), Construction (PET, PP), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of
