## Abstracts

According to our (Global Info Research) latest study, the global Recycled Resin market size was valued at US\$ 81460 million in 2025 and is forecast to a readjusted size of US\$ 116260 million by 2032 with a CAGR of 5.3% during review period.

Recycled resin, also known as recycled plastic resin, refers to a type of plastic material that is produced by recycling and reprocessing used or discarded plastic products. It involves collecting plastic waste, sorting and cleaning it, and then melting and reforming it into new resin pellets or granules. The recycled resin can then be used as a raw material in various industries to manufacture new plastic products. The process of recycling plastic waste into recycled resin helps reduce the reliance on virgin plastic production, minimize plastic waste in landfills, and contribute to a more sustainable and circular economy.

The core manufacturers of Recycled Resin in China include Veolia, Kingfa and Suzhou Jiulong Recycling & Technology. The top three companies have a market share of about 5%. In terms of product type, PET is the largest segment with approximately 34% market share. In terms of application, Packaging and Consumer Goods is the largest downstream segment, accounting for about 37% of the market.
