The global Red Grapefruit Powder market size is expected to reach \$ 48.65 million by 2032, rising at a market growth of 5.6% CAGR during the forecast period (2026-2032).

Red Grapefruit Powder is a fruit-based, water-dispersible powder made from red-fleshed or pink-fleshed grapefruit.

Upstream raw material is primarily ripe red/pink grapefruit fruit (fresh fruit as the core feedstock), and industrial supply commonly uses grapefruit juice/juice concentrate or fruit pulp derived from those red-fleshed cultivars. Downstream, red grapefruit powder is supplied to manufacturers for beverages and drink mixes, bakery & confectionery flavoring, dairy & desserts, and dietary supplement/nutraceutical formulations, where citrus flavor, acidity and “fruit-origin positioning” are needed.

In 2025, global sales of Red Grapefruit Powder reached approximately 3,520 tons, with an average global market price of around US\$ 9/kg. Production capacity varies significantly among manufacturers, with gross profit margins ranging from approximately 20% to 40%.

This report studies the global Red Grapefruit Powder production, demand, key manufacturers, and key regions.
